

UltraTect™ Safety Eyewear

UltraTect protective eyewear is made for the modern dental environment. The high-quality, lightweight frames and polycarbonate lenses are not only comfortable, but also stylish and durable, so you can focus on your work, not your safety glasses. UltraTect safety eyewear meets ANSI and CE safety standards for protection against impact injuries and chemical exposure.

Shape memory provides a more comfortable fit

Ultra-light polycarbonate lens offers high optical properties and scratch resistance

Glasses are flexible and impact resistant for the ultimate durability

The patented, overmolded, cushioned frame provides all-day comfort and prevents slipping

Orange lenses provide protection from UV and blue light

Wrap-around lens design accommodates most prescription eyewear

Hydrophobic and antireflective coating helps maintain visual acuity
